

**What A Waste Progress Report**  
**Sample County Senior Adult Center**  
**Report Date: 6/30/18**

#	NFESH Recommendation	SMART Goal	Progress
1	Reduce food waste at the Center	Reduce daily pan waste by 5% and reduce daily plate waste by 5% by 8/31/18.	Pan Waste -4% per day Plate Waste -12% per day Tried to be more conservative with the ordering because we have to order so far in advance. We have more drop-in's than we used to.
2	Engage the seniors at the Center to get more detailed feedback about specific food items	Engage the seniors at the center by <b>asking and recording</b> after lunch <b>daily</b> for their <b>feedback</b> on the meal. Inquire about each specific food item. Begin 3/1/18 and on-going	Trying to speak with the seniors, but nothing formal. If something is creating a lot of plate waste they log it for the dietitian. They need to find patterns across all centers because same menu for everyone.
3	Provide feedback on food items to appropriate parties	Turn recorded client feedback into caterer on a <b>weekly</b> basis. Begin 3/1/18 and on-going	Doing this weekly
4	Improve the rate at which clients keep their meal reservations	Talk with clients <b>monthly</b> at their Site Council Meetings about the importance of keeping meal reservations. Speak <b>one on one</b> with clients who consistently cancel. Consider using a system with the green and yellow cards. Begin 3/1/18 and on-going	Began doing this but have not seen any improvement yet.
5	Begin composting food waste	Start composting by 8/1/18. Once compost is set up and staff has learned how to use it, begin composting our daily food waste for use in our garden.	Composting hasn't started yet. Scheduled to start 7/9.
